Debbie,

I am sending a different version. Hopefully you will be able to read it.

No, the ACCORD group will not wear the nicotine patch. Training the staff one to 2 weeks prior to start date should be sufficient. Hans has suggested that the cigarettes be shipped 4 weeks prior to the start date.

The Long Term Study has not been cancelled. At the moment the start-up date is in June of this year. Hans was to check with Randy to see how the chip development was proceeding.

Bettie - please fax me a copy of the attached timetable (752-5600). I cannot open the file because you have a later version of Microsoft. Please send me the revised Draft of the protocol with all the changes as soon as it is available next week. The conditions you described for the ACCORD smoker groups (restricted and unrestricted) are not different from the way my copy of the protocol reads dated 12/4/2001. Has anything else changed with the ACCORD smoker groups? Please confirm that the ACCORD smokers will now participate in the nicotine patch evaluation. The timing of the training depends on the facility schedule - I would think that 1 or 2 weeks prior to the start of the study would be appropriate. Please confirm so that the people coming from Ashland can make arrangements. When do you want the product and the lighters to be shipped?

Also, what is the status of the Long Term Study? Has it been cancelled?

Thanks.

Just wanted to update you on the meeting that was held. The time schedule for the start of the study remains the same. Participants will check-in on March 14th.

A few changes have been incorporated into the protocol. Participants will be randomized into 2 ACCORD groups. One group will be restricted in the number of cigarettes that can be smoked and the other group will be allowed to smoke in an unrestricted manner. Other changes will be noted in the protocol. They should not affect the ACCORD groups. We should receive a revised protocol next week and I will send a copy to you.

I have a copy with some of the changes in it. If you do not wish to wait until next week I can send it to you today.

I am attaching a preliminary draft of the time schedule for the study. Please let me know the time you have in mind for the training.
